

LDBIO DIAGNOSTICS

IMMUNOBLOTS & RAPID TESTS
for Parasitology and Mycology

PRODUCT LIST

www.ldbiodiagnostics.com

IMMUNOBLOTS

Qualitative tests of serological diagnosis by immunoblot assay of parasitology and mycology diseases intended for confirmatory testing of a positive or equivocal result obtained through classic screening tests

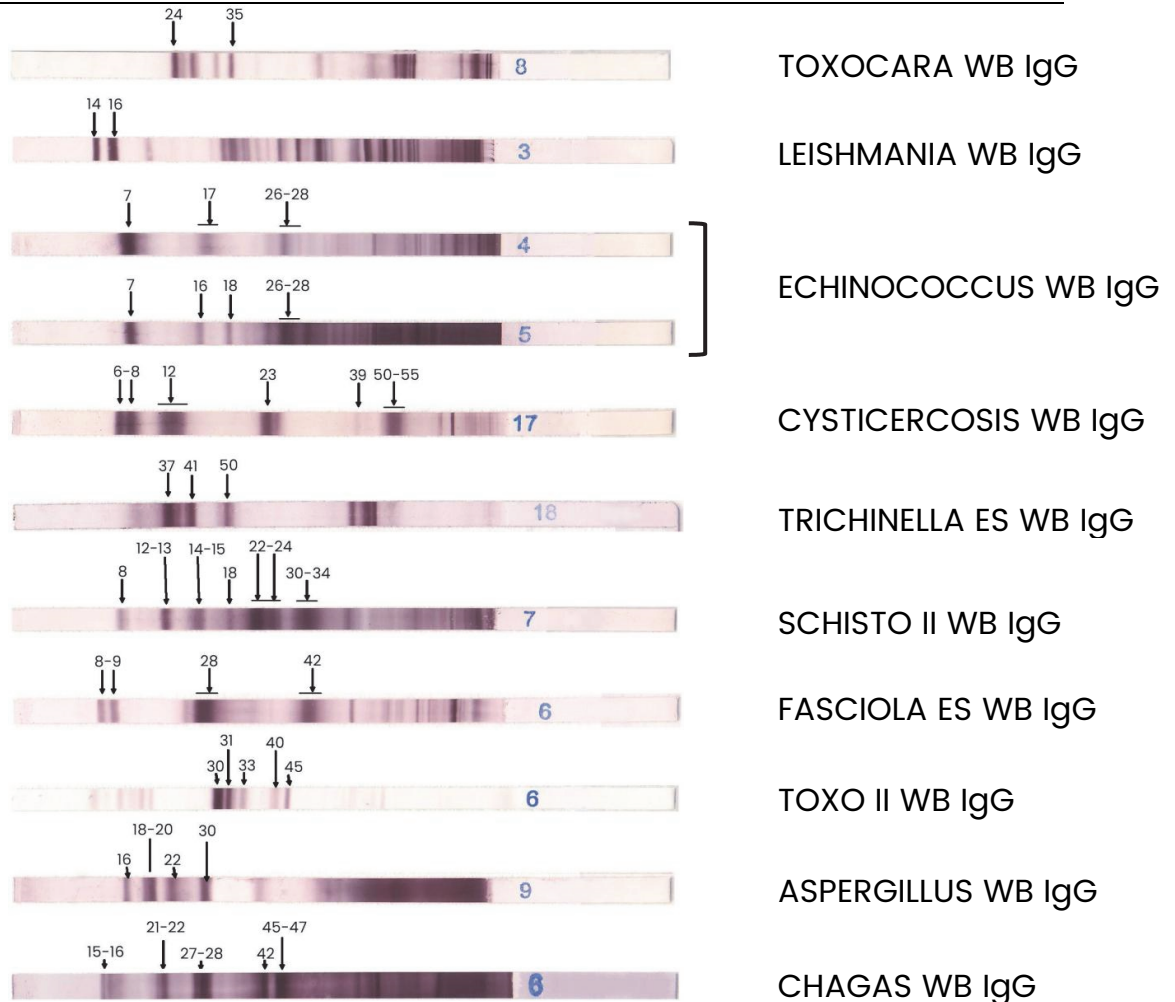

Each kit is composed of sensitized and pre-cut strips and ready to use reagents.

TOXOPLASMA IgG – IgM – IgA

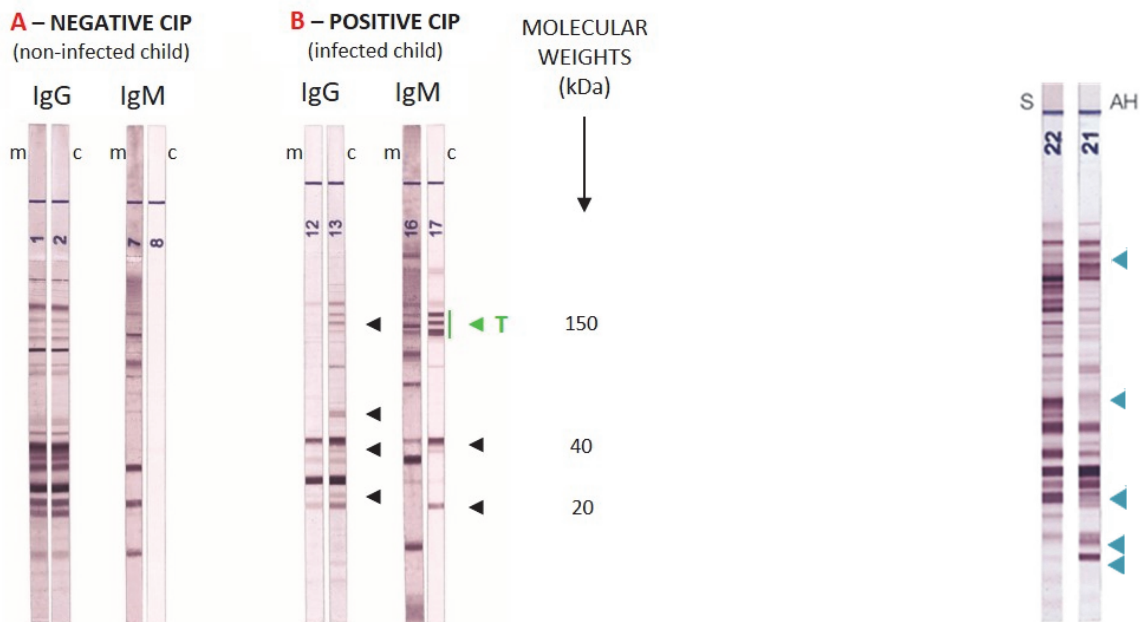

IMMUNO-PROFILES COMPARISON

CONGENITAL TOXOPLASMOSIS DIAGNOSIS AT BIRTH

CIP WB between Mother's (m)
and Child's (c) serum.

OCULAR TOXOPLASMOSIS DIAGNOSIS

CIP WB between Serum (S) and
Aqueous Humor (AH).

RAPID TESTS

Unitary qualitative rapid test based on the immune chromatography technology (lateral flow), allowing the simultaneous detection of both IgG and IgM class antibodies in human sera.

Each kit is composed of the cassettes and the eluent solution that allows the chromatography.

The migration is completed in 20-30 minutes.
